

Developer / Programmer Application Questionnaire:

Basic Information

1. Full Name

Ans: Qazi Abdul Rahman

2. Email Address

Ans: qaziabdurrahman12@gmail.com

3. Contact Number

Ans: 03171150595

4. Current City / Location

Ans: Karachi, Pakistan

5. LinkedIn / Portfolio / GitHub URL

Ans: <https://github.com/abdurrahman122001>

6. Applying For (Frontend / Backend / Full Stack)

Ans: Applying for Full Stack Development

Professional Background

1. Total Years of Experience in Software Development

Ans: 2.5 years

2. Current Employer / Company / Freelancer (If applicable)

Ans: Mavens Advisor

3. Current Job Title / Freelancer

Ans: Senior Software Engineer

4. Notice Period (If applicable)

Ans: 30 Days

5. Current Working Model (Remote / On-site / Hybrid)

Ans: On-site

6. Are you comfortable working in a **remote setting?**

Ans: Yes

7. Are you available to work **4 hours per day if we require it at the start?**

Ans: Yes

8. Have you worked in a software house before? (Yes/No)

Ans: Yes

9. What types of projects have you worked on? (Web / Mobile / SaaS / API / Custom Solutions / Other)

Ans: I have worked on **Web applications, SaaS platforms, API development, and custom software solutions**, including full-stack projects involving frontend, backend, and third-party integrations.

Technical Expertise

1. Primary Programming Language(s)

Ans: JavaScript, TypeScript, React, Vue.js NextJS, PHP, and Laravel

2. How many **years of experience do you currently have?**

Ans: 2.5 years

3. Do you have professional experience working with **Vue.js?**

Ans: Yes

4. Are you experienced in **Node.js and Laravel for backend development?**

Ans: Yes

5. Are you experienced in **Nuxt?**

Ans: Yes

6. Do you have hands-on experience with **TypeScript?**

Ans: Yes

7. Have you developed and deployed a complete project or **module independently?**

Ans: Yes

8. Secondary Skills / Technologies

Ans: Wordpress, Flutter

9. Frameworks / Libraries you are confident in

Ans: React.js, Next.js, Vue.js, Node.js (Express), Laravel, React Native

10. Experience with Version Control (Git / Bitbucket / GitHub / GitLab)

Ans: Experienced with Git, GitHub, GitLab, and Bitbucket for version control and collaborative development.

11. Database Experience (MySQL / PostgreSQL / MongoDB / Firebase / SQL Server / Other)

Ans: MySQL, PostgreSQL, MongoDB, Firebase, and SQL Server

12. API and third-party integrations experience? (Yes/No)

Ans: Yes

13. Development Tools / IDEs you use

Ans: VsCode, Android Studio

14. Experience with CI/CD, DevOps, or Cloud Platforms

Ans: Experience with basic CI/CD pipelines, deployment workflows, and cloud hosting using platforms like AWS, Vercel, Netlify, and shared/VPS servers. Familiar with environment configuration, build automation, and deployment best practices.

15. Have you worked in Agile/Scrum environments? (Yes/No)

Ans: Yes

16 Describe a challenging technical problem you faced in a project and how you solved it.

Ans: In a React + Node.js + MongoDB application, I faced slow load times and inconsistent data due to heavy aggregation queries and frontend-based role filtering. I fixed this by optimizing MongoDB queries, adding indexes, moving role-based logic to the backend, and implementing server-side pagination, which significantly improved performance and data accuracy.

Teamwork & Project Experience

1. Are you comfortable collaborating with QA, Designers, and PMs? (Yes/No)

Ans: Yes

2. Task management tools you've used (Jira / Trello / ClickUp / Asana / Basecamp / Other)

Ans: Jira, Trello, ClickUp,

3. How do you handle code reviews and feedback?

Ans: I welcome constructive feedback, follow coding standards, document changes clearly, and iterate quickly to improve code quality and maintainability.

4. Have you led or mentored junior developers? (If Yes, please describe)

Ans: Yes. I've guided junior developers through code reviews, best practices, and problem-solving while supporting their growth and confidence.

Salary & Job Expectations

1. Current Salary (PKR)

Ans: 75,000

2. Expected Salary (PKR) / 4 Hours per day

Ans: 50,000

3. Expected Salary (PKR) / 8 Hours per day

Ans: 100,000

4. Joining Availability

Ans: If it is a part-time opportunity, I can join immediately. For a full-time role, my notice period is 30 days.

Problem-Solving & Mindset

1. How do you handle tight deadlines or high-pressure situations?

Ans: I prioritize tasks, break work into manageable milestones, communicate proactively, and stay focused on delivering core functionality first.

2. What motivates you to write clean, efficient code?

Ans: Maintainability, scalability, and long-term project health motivate me to write clean and efficient code.

3. Most challenging project you've worked on

Ans: A complex SaaS platform involving real-time data, role-based access control, and multiple third-party integrations.

4. Your professional goals for the next 2 years

Ans: To grow as a senior full-stack engineer, lead complex projects, and contribute to scalable, high-impact products.

Additional Information

1. Have you worked with international clients? (Yes/No)

Ans: Yes

2. Any commitments that may affect your work?

Ans: No

3. Why do you want to join our company?

Ans: I'm interested in contributing my technical expertise to meaningful projects while growing within a professional, collaborative environment.

4. Anything else you'd like to share about your skills or experience?

Ans: I bring strong full-stack experience, adaptability, and a problem-solving mindset, with a focus on delivering reliable, user-focused solutions.

Consent

1. I confirm that all information provided is true to the best of my knowledge. (Yes/No)

Ans: Yes
