Subject: Job Offer Letter

Mojo Solutions and Services MSS LLC (later referred to in this document as MSS) is glad to offer you Gaurav Goyal job as “Engineer- RF Design”. This offer letter is also subject to Main Job Responsibilities and Terms and Conditions of the offer as described below.

Main Job Responsibilities:

Responsible to perform greenfield and brownfield RF Design, modifications, and Optimization of 4G, 5G, and Fixed Wireless Access networks sub-6GHz & CBRs bands.

- Set up, configure, and utilize Atoll projects from scratch and associated prediction models (Aster, etc.) for RF Design and Optimization purposes, for multiple bands.
- Setup, configure, and utilize advanced Atoll features for coverage and cell planning including Automatic Cell Planner, Monte Carlo analyses, traffic map generation, point-to-point and point-to-multipoint analytics, etc.
- Determine, analyze, recommend, and implement RF shaping optimization changes to optimize 4G & 5G networks for multiple bands.
- Perform model calibration and analysis as needed.
- Read and understand link budgets and link curves.
- Attend internal and customer-facing meetings and conference calls to discuss relevant topics to the project.
- Develop and deliver regular status reports using PowerPoint, Word, and Excel.
- Perform RF redesign based on customer feedback and site fallout.
- Document and track parameter and configuration changes as needed.
- Develop and submit supporting documentation (RFDS, etc.) as needed for parameter and RF shaping changes.
- Communicate with customer, SEA RF, and deployment teams to be able to get deployment done while meeting set performance criteria.
- Contribute to deep technical discussion with team members.
- Contribute to hands-on analysis of network performance issues and benchmarking data (i.e., air interface, call processing, etc.) and creating solutions to meet network optimization expectations.
- Adapt to changes in a dynamic business environment.

Office: 1665 E 4th Street, Santa Ana, Suite 207, CA, 92701 Phone: (925)699-9264 Fax: +1 877 223 7632

- Exercise judgment within generally defined practices and policies in selecting methods and techniques for obtaining solutions and results.
- Present ideas, technical and non-technical, in a logical, compelling manner in a written format and verbally in both small and large group settings.
- Work with the Network Engineering and Operations Teams on the cell site's antenna and RF equipment configuration and database parameters.
- Other duties as assigned
