Terms & Conditions:

Job Title: RF Engineer

Job Description:

Candidate must have strong experience in Atoll and GIS analytics. Position will be based in Plano TX and will be customer facing.

- Responsible to perform greenfield and brownfield RF Design, modifications, and Optimization of 4G, 5G, and Fixed Wireless Access networks sub-6GHz & CBRS bands.
- Set up, configure, and utilize Atoll projects from scratch and associated prediction models (Aster, etc.) for RF Design and Optimization purposes, for multiple bands.
- Setup, configure, and utilize advanced Atoll features for coverage and cell planning including Automatic Cell Planner, Monte Carlo analyses, traffic map generation, point-to-point and point-to-multipoint analytics, etc.
- Determine, analyze, recommend, and implement RF shaping optimization changes to optimize 4G & 5G networks for multiple bands.
- Perform model calibration and analysis as needed.
- Read and understand link budgets and link curves.
- Attend internal and customer-facing meetings and conference calls to discuss relevant topics to the project.
- Develop and deliver regular status reports using PowerPoint, Word, and Excel.
- Perform RF redesign based on customer feedback and site fallout.
- Document and track parameter and configuration changes as needed.
- Develop and submit supporting documentation (RFDS, etc.) as needed for parameter and RF shaping changes.
- Communicate with customer, SEA RF, and deployment teams to be able to get deployment done while meeting set performance criteria.
- Contribute to deep technical discussion with team members.

5- Qualifications:

- Recent experience in RF design of wireless networks for Fixed Wireless Access (FWA) and/or CBRS.
- Strong understanding of MIMO and Beamforming fundamentals as it relates to RF Design.
- Strong understanding of link budgets and link curves and how they are used in RF Design.
- 2+ years recent and relevant experience in RF Design.
- Strong hands-on experience with using Atoll and associated modules (ACP, Aster, etc.) for RF Design and RF Optimization.
- Strong understanding of antenna patterns.
- Understanding of terminal equipment characteristics including Customer Premise Equipment (CPE) devices and wireless hotspots.
- Solid understanding of 4G & 5G parameters and functionality, as they relate to RF Design.
- CBRS design and/or deployment experience a strong plus.
- Degree in electrical or electronics
- A solid understanding of RF fundamentals and data network protocols
- Proven ability to manage multiple priorities in a fast paced environment
- Excellent verbal and written communication skills to communicate key technical concepts, ability to package complex ideas into logical, easy-to-follow progressions. Must be able to communicate clearly and concisely to customers and internal teams.
- Position requires daily office attendance on customer premises.

Approved weekly timesheets, either electronic or paper, are required to be submitted by 8:00 PM Eastern Time Zone every Friday. Client work does not include travel or training (unless specified in writing by client.). Client holidays require subcontractor to enter "0.00" for the hours in that day. Subcontractor is required to work a minimum of 8 hours per day.

Invoices can only be sent once a calendar month and have been completed along with verified hours in a timesheet. All invoices must be sent to accounting@trudynamic.com, you cannot send invoices to recruiting, sales, or HR email ID's, only accounting@trudynamic.com. No other TruDynamic email IDs should be CC'd on invoice submissions. If you are submitting invoices for multiple resources, each resource must be on a separate invoice and separate email. Invoice receipt date is the date the email was received by accounting@trudynamic.com, regardless of the invoice date.

This Purchase Order is issued pursuant to the Subcontractor Master Services Agreement ("Agreement"). Any term not otherwise defined herein shall have the meaning specified in the Agreement. All terms and conditions of the Agreement, stated herein, do not purport to modify the Agreement and in case of a conflict between its terms of this Purchase Order and the Agreement, the terms of this Purchase Order should govern the Services contemplated herein and for all other purposes, the terms of the Agreement shall govern the relationship between the parties and their respective obligations. Purchase order is invalid without a countersigned

I hereby certify that I am authorized to accept this Purchase Order and acknowledge the terms listed above.
