

ABDUR RAHMAN

Senior Full Stack Software Engineer | MERN • AI • SaaS

Karachi, Pakistan | 0317 1150595 | qaziabdurrahman12@gmail.com | linkedin.com/in/abdur-rahman-5b8026222

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 3.5+ years of experience architecting and delivering enterprise SaaS platforms, AI-powered solutions, and HRMS systems using React, Next.js, TypeScript, Node.js, Express.js, Laravel, MongoDB, and MySQL. Proven track record integrating OpenAI APIs and Retrieval-Augmented Generation (RAG) pipelines to automate business workflows, alongside strong expertise in real-time systems, REST API design, and production deployment on Linux with PM2 and Nginx. Adept at collaborating cross-functionally in Agile/Scrum environments to ship scalable, high-impact products.

CORE TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, React Native

Backend: Node.js, Express.js, Laravel, PHP, REST APIs, JWT, Socket.IO

Database: MongoDB, PostgreSQL, MySQL, Firebase

Artificial Intelligence: OpenAI API, RAG, Prompt Engineering, AI Automation, Vector Search

DevOps & Tools: Linux, PM2, Nginx, Git, GitHub, GitLab

PROFESSIONAL EXPERIENCE

Software Engineer | *Mavens Advisors*

Feb 2023 – Present

- Led development of enterprise HRMS, Payroll, and ICMS platforms alongside AI-enabled business applications, driving product decisions from architecture through deployment.
- Built and maintained scalable REST APIs and backend services using Node.js, Express.js, and Laravel, supporting high-volume enterprise workloads.
- Implemented OpenAI-powered automation and RAG pipelines to streamline intelligent workflows, reducing manual processing time.
- Developed real-time communication features using Socket.IO to enable instant, in-app messaging and notifications.
- Integrated third-party APIs and automated email workflows, and managed end-to-end production deployments.
- Collaborated within Agile/Scrum teams alongside product managers, QA engineers, and designers to deliver features on schedule.

Full Stack Engineer | *Fluffy Mojo (Part-time, Remote — United Kingdom)*

May 2024 – Aug 2024

- Contributed as a remote Full Stack Engineer on a part-time basis, working across Node.js, PHP and related technologies.
- Delivered features and support in a distributed, remote-first team environment for a UK-based client.

Front-End Developer | *Crea-Biz*

Jun 2022 – Oct 2022

- Designed and built responsive business websites and customized WordPress solutions for diverse client requirements.

KEY PROJECTS

Enterprise HRMS, Payroll & ICMS Platform

- Architected a full-scale enterprise HRMS, Payroll, and Internal Communication Management System from the ground up.
- Developed Attendance, Employee Management, Leave, Payroll, Reimbursements, Loan, Team Management, and Approval modules.
- Designed an automated supervision hierarchy with intelligent approval routing.

- Implemented AI-powered leave approval using the OpenAI API and RAG, plus AI-assisted employee onboarding workflows.
- Built real-time messaging with Socket.IO and automated email notifications for employees, supervisors, and clients.
- Deployed and maintained production infrastructure on Linux using PM2 and Nginx.

LinkedIn AI Automation Platform

- Generated AI-powered LinkedIn posts using OpenAI and automated scheduling and publishing workflows.
- Integrated external APIs for streamlined content management.

AI Knowledge Assistant (RAG)

- Built a Retrieval-Augmented Generation pipeline with vector search integrated into OpenAI APIs.
- Delivered context-aware, enterprise-grade responses to improve internal knowledge retrieval.

RecruitInn Platform — AI Interview

- Developed production features, dashboards, and API integrations with a fully responsive UI.
- Built an AI-powered interview module to conduct and evaluate candidate interviews within the recruitment platform.
- Optimized frontend performance using React and Next.js.

Zones E-Commerce Enterprise Platform

- Architected a multi-tier zone-based e-commerce system covering State Zone, City Zone, Sub-City Zone, and Area/Hyperlocal Zone levels.
- Built zone-wise inventory, pricing, and order-routing logic to support hyperlocal delivery and enterprise-scale operations.

AI-Based Travel Booking Chatbot

- Built an AI-powered chatbot to search and retrieve relevant travel details from documents and databases using contextual search.
- Delivered accurate, context-aware travel information to users through natural language queries.

Travel & Booking Platform

- Built package search, category management, booking flows, and supporting backend APIs.

Commercial Business Websites

- Delivered multiple production applications for international clients using React, Next.js, Laravel, Node.js, and WordPress.

EDUCATION

BS Software Engineering

Mohammad Ali Jinnah University | Spring 2021 – Spring 2025

Intermediate (Pre-Engineering)

Johar Degree College | 2018 – 2020

Matriculation

Madina Tul Ilm School | 2018

Hafiz-e-Quran — Madina Tul Ilm School
